Sir:

Please amend Claim 76 as follows:

- Rule 126
3
11/15/04
1.
~~76.~~ (Amended) A method for capture of a biological analyte onto a substrate wherein:
- (a) the ligands used are selected from the group consisting of: heme compounds, siderophores, polysaccharides, and peptides specific for outer membrane proteins, conjugated lipids prions, and microbial protein targets;
 - (b) the ligand is tethered at a distance of ~~at least fifteen~~ around forty Å from the substrate surface for the capture of microorganisms;
 - (c) the substrate is suitable for a column packing;
 - (d) the biological analytes are selected from the groups of: bacteria, viruses,

rickettsiae, protozoa, fungi, prions and microbial protein targets;

- (e) the capture of the biological analytes on the substrate is used for the concentration of the biological analyte from water samples;
- (f) the capture of the biological analytes on the substrate is used for the concentration of the biological analyte from medical samples ;
- (g) the capture of the biological analytes on the substrate is used for the concentration of the biological analyte from veterinary samples;
- (h) the capture of the biological analytes on the substrate is used for the concentration of the biological analyte from an aerosol;
- (i) the capture of the biological analytes on the substrate is used for the concentration of the biological analyte from food product slurries;
- (j) the capture of the biological analytes on the substrate is used for the concentration of the biological analyte from food ingredient slurries; and
- (k) the capture of the biological analytes on the substrate is used for the concentration of the biological analyte from soil slurries.

Applicant requests that the foregoing Amendment be entered prior to examination.

Respectfully submitted,

K. S. Cornaby
